TO THE CHAIRMAN AND MEMBERS OF THE
RURAL DISTRICT COUNCIL.

MR. CHAIRMAN, MRS. RILEY AND GENTLEMEN,

I have the honour to submit to you my Annual Report upon the Health and Sanitary Administration of the Rural District for the Year 1938.

The Report is an "Ordinary Report," and therefore mainly statistical.

The Birth Rate is 15·1 per 1,000 population, being ·3 per 1,000 in excess of the Rate for the previous year. The Rate for England and Wales is 15·1 per 1,000.

The Death Rate is 10·77 per 1,000 population, compared with a rate of 11·9 per 1,000 for the year 1937 and with a rate of 11·6 per 1,000 for the whole country.

The Infantile Mortality Rate is 45·7 per 1,000 Births, and is 17·0 per 1,000 less than the Rate for 1937 and 7·3 per 1,000 less than the rate for the whole country.

I have to record a further decline in the incidence of acute Infectious Disease.

The various Tables indicate the work which has been carried out under the Housing Acts.

I desire to express my thanks to the Chairman and Members of the Public Health Committee for their support during the year.

My thanks are also due to the Staff of the Department for their co-operation.

I have the honour to be,

Your obedient servant,

W. BERTRAM HILL.

The rate for England and Wales is 11·6 per 1,000.

The Registrar-General has supplied a “Comparability Factor,” by which the crude death rate of the Area, viz., 10·77, should be multiplied in order to make it comparable, from a mortality point of view, with the crude death rate of the country as a whole or with the mortality of any local area.
